-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 13-15 have been renumbered 12-14 for purposes of this Office action. However, applicant should officially renumber the claims according to the rule cited above, in the next communication to the Office. The dependencies of these claims should also be changed in order to avoid confusion and indefiniteness.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 5-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over ().

Regarding Claims 5, Kudo et al. teach the use of an antenna integrated into plastic paneling parts with coating films, where the antenna may be on the inner side of a resin-made bumper or as double-sided tape thereon. The antennas 10-2, etc., are formed as a coating film on a substrate 10-1 with a protective sheet 10-3.

Art Unit: 2828

The patent to Shakhnovich teaches the use of a multi-layered structures/articles used in coating bumpers and antennas, with color layers, etc. (see columns 12-13). It would have been obvious to the skilled artisan to employ the multi-layered article/structure of Shakhnovich in the antenna structures of Kudo et al. for the purpose of providing ease of manufacture, assembling and environmental protection of the antenna on a vehicle bumper, for example. Thermoforming and setting are also suggested in the method of Shakhnovich.
